ANESTHESIA AUTHORIZATION

New Hope Animal Hospital wants to insure your pet receives the best possible health care that we can provide. Since _____ cannot answer our questions on what treatment he/she should receive, please take a moment to answer a few questions before you leave your pet with us.

Main reason for visit:

An assistant carefully monitors anesthesia and recovery. Though we take every effort and precaution reasonable for your pet's safety and comfort, with any anesthetic or surgical procedures, there are associated risks beyond the control of our doctors and staff. Please initial here that you have read the above statement and understand the associated risks and will not hold New Hope Animal Hospital or any and all of its agents responsible. X_____

OPTIONAL TESTS AND MEDICATIONS

To lessen the risks associated with anesthetic procedures, we offer a pre-surgical work-up to assist the doctors in discovering any hidden health problems your pet might have. This group of in house tests includes a test for clotting, anemia and kidney function and is offered to you for an additional fee of \$20. Please, initial one of the following:

YES, I accept_____ No, I decline_____

PLEASE READ BACK AND SIGN

Vaccines are an important part of your pet's health care. They prevent serious and sometimes deadly diseases that we see in our practice. Listed below are the vaccines we recommend for dogs and cats. Rabies vaccine is an annual vaccine required by law.

For our dog patients:

- Is your dog on a monthly heartworm preventative? _____
- When was his or her last blood test for heartworms? _____
- Would you like your dog tested and started on a preventative? _____
- Does your dog need a stool check for worms? _____

For our cat patients:

- Has your cat been tested for Feline Leukemia and Feline ImmunodeficiencyVirus? _____
- Would you like him or her to be tested today? The cost of the test is \$30. _____
- Does your cat require a stool check for worms? _____
- Is your cat on a monthly heartworm preventative? _____
- Would you like to have your cat started on a heartworm preventative? _____

The use of microchips has resulted in the safe return of thousands of lost pets. Our hospital recommends the Home Again microchip and can easily put one under the skin of your pet while it is asleep. The cost of the microchip is \$38.50. You will be provided with paperwork to send to the national database maintained by AKC; this registration costs \$17.50. This is a lifelong means of identifying your pet and increasing your chances of its safe return should it become separated from you. Would you like your pet microchipped today? _____

Additional comments or treatments: _____
